Andrii Deisan

Product Engineer · Frontend-focused

Ukraine / ideysan@gmail.com / LinkedIn / GitHub / Telegram

PROFILE

I'm a Product Engineer with a strong frontend focus and 4+ years of experience building web products. My work spans experimentation, personalization, e-commerce, and internal tooling. I collaborate with product, design, backend, and ML teams, combining product context with attention to performance, testing, and maintainability.

SKILLS & TOOLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Motion

State & data: React Query, Redux Toolkit, reselect, Zod, REST, GraphQL

CMS & experimentation: Strapi, GrowthBook, A/B testing, i18n, Lingui, Node.js · SSR/CMS tooling

Quality & delivery: Jest, Vitest, Webpack, Rspack, Git, ESLint, Oxlint

Analytics: Amplitude, GTM, Meta Pixel/CAPI, SQL, BigQuery

AI-assisted development: Claude Code, Codex, MCP; human review and validation.

EXPERIENCE

Promova / Full-Stack Engineer

Feb 2025 - Aug 2026 · Frontend-focused

- Developed marketing funnels, personalized components, conditional flows, and AI Tutor frontend features with product, design, backend, and ML colleagues.
- Implemented updates to Profile Summary and Scratch Promocode. Team-reported relative A/B results: +15% ARPU for Profile Summary; +40% ARPU, +60% paywall-to-purchase conversion, and -40% cancellation rate for Scratch Promocode.
- Improved Solidgate checkout and Apple Pay web behavior, optimized asset/data loading, and fixed device-data handling. Added unit tests and Grafana monitoring.
- Built Strapi/GrowthBook experimentation tools, CMS preview, and funnel visualization. Simplified the workflow from 6 steps to 1 click; team-reported testing cadence grew from 7-10 to 30-35 tests/month. Automated localized sales-page duplication: 8 hours to 5 minutes (PM estimate).
- Improved Amplitude and Meta Pixel/CAPI delivery through frontend and targeted existing Go/Fiber changes. Team-reported Purchase Event Match Quality rose from 7.7 to 8.3/10. Wrote a Strapi cleanup migration and verified recovery with DevOps.
- Developed frontend-to-CMS MCP workflows and quiz-design, creative-generation, and ad-research tools. Used Claude Code and BMAD Method for AI-assisted development.

EXPERIENCE / CONTINUED

Memcrab / Frontend Engineer

Sep 2022 - Feb 2025

- Built drag-and-drop page composition and public rendering so managers could assemble blog and product pages independently.
- Developed e-commerce catalog, search, cart, delivery, and admin features; integrated backend APIs and blog CRUD with media and SEO fields.
- Reduced client JavaScript through bundle analysis and library removal; migrated Webpack to Rspack for faster builds and development updates.
- Created and maintained Zod schemas for checkout, cart, and localized blogs, linking runtime validation with TypeScript types and error handling.
- Maintained React SSR, localization, and typed Redux/reselect selectors; added targeted Jest date-validation tests. Collaborated with backend, design, and QA.

HolyWater / Frontend Developer

Jan 2022 - Jun 2022

- Developed React/TypeScript features, integrated REST/GraphQL APIs, and used Redux Toolkit and Effector for state management.
- Applied Feature-Sliced Design and collaborated with product and design teams in an agile environment.

Lumi-Dent / Webmaster / Content Manager

May 2018 - Jul 2021

- Updated content and HTML/CSS; configured SEO and optimized website pages for search engines.

EDUCATION

Master’s degree, Mechanical Engineering

NTUU “Igor Sikorsky Kyiv Polytechnic Institute” · 2010 - 2016

SELECTED LEARNING

Agentic Engineering Workflows · SULICOM AI Academy · Oct 2026

Front-end Architecture · Genesis Tech · Lecture series · Apr 2026

Foundational courses · Anthropic · Dec 2025

Testing JavaScript and React applications · Udemy · Apr 2024

Ultimate Next.js 13 Course · JavaScript Mastery · Nov 2023

LANGUAGES

Ukrainian - Native / English - B1 / Intermediate
